

**YOU HAVE JUST RECEIVED A WARNING
OR CITATION FOR VIOLATION OF
VERMONT'S CHILD RESTRAINT LAW**

Listed below and on the back of this card are tips on keeping kids safe when riding in motor vehicles. Consider these life-saving recommendations when installing a car seat or buckling up kids:

- Children under 12 should never ride in front of an active airbag
- Car seats must be put in tight, 1 inch or less movement side to side and front to back at the belt path of the car seat - Check by pulling at the opening of the belt path on the car seat for a tight fit
- Lean or kneel into the car seat, then buckle it in with the seat belt
- Check the seat belt for instructions on installing a car seat. Your seat belt may need an additional device for a proper fit
- Harness straps should be snug like a hug
- Keep harness chest clip at armpit level
- Never install a car seat on a side-facing or rear-facing vehicle seat
- All car seats and seat belts involved in a crash must be replaced
- Refer to car seat instructions and vehicle owner's manual for more details on proper installation of car seats

**Motor vehicle crashes are the leading cause of death for
our young children**
