

Pickleball Net Instructions for Rec Area Tennis Courts

When not already in use by tennis players, the two courts closest to Websterville Rd (circled in red below) can be converted to pickleball courts.

To convert, the nets need to be lowered to pickleball height: Simply clip the bottom of all three straps to the eyelet bolt in the ground below the strap. The straps are pre-adjusted to the correct length.

You may need to firmly, but gently, pull down on the net before the clip will reach some of the eyelets.

Before leaving the court, please unclip the straps to return nets to tennis height. Thank you!
